PROFILE

I am a software developer with extensive experience. After making Aliyah and working in Israel as a developer for a year and 2 months, I decided to attend a boot camp to formalize my full-stack knowledge. Thus I am seeking a junior full-stack position. I have strong communication and organizational skills. Team player and leader with an eye for detail. I am a quick learner and like challenges and problem-solving. I spot the big picture for project design and management, and for translating needs into clear specifications. I identify individuals with complementary talents to form a team and mentor each one's development.

EXPERIENCE

AUTOMATION SOFTWARE DEVELOPERS LEADER

Tachyonix Netanya   Jun 22- Mar 2023 (10 months)

- Conceived and implemented automatic tests using random values and random parameters to check the consistency and widen the test coverage
- Adequation of the automatic test suite for running in 7 different homologation environments using clean and scalable code
- Gathered and developed talents to form the new QA team
- Automatic tests | Versions release | Communication with other teams

AUTOMATION SOFTWARE DEVELOPER

Tachyonix Netanya   2022 (4 months)

- Delivered a fully functional Automated test environment
- Automatic tests refactoring, eliminating hard-coded features and repeated codes, making it easier to maintain and grow
- Manual tests for version release
- SAP database and customization tests

PARTNER | SOFTWARE DEVELOPER

Longit   2009-2021 (12 years)
